## Information

---

### Establishment

BNP Paribas InstiCash (“the Company”) is an open-ended Luxembourg investment company (*société d’investissement à capital variable* - SICAV) pursuant to Part I of the law of 17 December 2010, as amended relating to Undertakings for Collective Investment as well as to Directive 2009/65 as amended by the Directive 2014/91 (UCITS V).

The Company was incorporated in Luxembourg on 30 June 1998 for an unlimited period of time under the number B 65 026.

### Periodic reports

Audited annual accounts as at 31 May, unaudited semi-annual accounts as at 30 November, as well as the list of changes (purchases and sales of securities) made in the composition of the investment portfolio are kept at the Shareholders’ disposal free of charge at the Depositary, the Domiciliary Agent, the Representative in Switzerland and the other banking institutions appointed by it, as well as at the registered office of the Company. These reports concern both each individual sub-fund and the Company’s assets as a whole.

The financial statements of each sub-fund are drawn up in the currency of the sub-fund, but the combined accounts are denominated in euros (EUR), in accordance with a decision of an Extraordinary General Meeting of Shareholders held on 18 September 2001. The annual accounts are available within four months of the closing date of the financial year. The semi-annual accounts are published within two months of the end of the half-year in question.

### Information to the Shareholders

The Company publishes the legally required information as to net asset values and dividends in the Grand Duchy of Luxembourg and in all other countries where the shares are publicly offered.

This information is also available on the website: [www.bnpparibas-am.com](http://www.bnpparibas-am.com).

The Company publishes an annual report closed on the last day of the financial year, certified by the auditors, as well as a non-certified, semi-annual interim report closed on the last day of the sixth month of the financial year. The Company is authorised to publish a simplified version of the financial report when required.

The Articles of Association, the Prospectus, the KIDs, and periodic reports may be consulted at the Company’s registered office and at the establishments responsible for the Company’s financial service. Copies of the Articles of Association and the annual and interim reports are available upon request.

Except for the newspaper publications required by Law, the official media to obtain any notice to shareholders will be our website [www.bnpparibas-am.com](http://www.bnpparibas-am.com).

Documents and information are also available on the website: [www.bnpparibas-am.com](http://www.bnpparibas-am.com).

### **BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D)**

#### **Monetary policy pursued by the European Central Bank (ECB) during the financial year**

The European Central Bank (“ECB”) raised its three key rates by 25 bps in June, July and September, taking the deposit rate to 4.00%, the rate on the marginal lending facility to 4.75% and the rate on main refinancing operations to 4.50%. Since the start of the hikes in July 2022, rates have been raised by 450 bps. The ECB’s announcement suggested that this hike would be the last in this cycle, and subsequent comments indicated that the choice between leaving rates as they were and increasing them in September had been a difficult one, given the particularly uncertain environment.

At a press conference on 26 October, which accompanied what was then presented as a pause in tightening, Christine Lagarde acknowledged that the transmission of monetary policy was “forceful, dampening demand and thereby helping to push down inflation”. It soon became clear that the Governing Council was concerned about the downside risks to growth from weak domestic demand. In December, the ECB made a point of repeating that it was “too early to declare victory in the battle against inflation” because “domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs”. The Governing Council also decided to advance the normalisation of the Eurosystem’s balance sheet by reducing the pandemic emergency purchase programme portfolio (“PEPP”) by an average of EUR 7.5 billion per month in the second half of 2024 and by discontinuing reinvestments at the end of 2024. In January and February, official comments were aimed at dialling down the expectations of a rapid cut in key rates that had emerged in late 2023. Christine Lagarde indicated that the consensus on the Board of Governors is that it was “premature to discuss rate cuts”. The minutes of the monetary policy meeting on 25 January showed that, given the uncertainty over future wage trends (and therefore inflation), the risk of cutting interest rates too early is considered greater than that of cutting them too late. In March, however, the general tone of the press release, the press conference and the new official forecasts (growth and inflation revised slightly downwards) confirmed that an initial cut in key rates should be announced in June. This commitment gathered strength with each passing week, but questions arose about the pace that would be adopted after this initial stage: while at the beginning of March the futures markets reflected a total of four 25-bp cuts over 2024, this number fell to three at the beginning of May and was just over two at the end of the month. The cautious statements made by Isabel Schnabel (warning of the risk of premature easing) and Philip Lane (emphasising the need to remain restrictive this year) contributed to these adjustments, as did economic growth indicators that were finally trending upwards.

#### **Management policy**

The sub-fund’s net assets grew sharply, despite high volatility in the AUM during the period under review. They rose from EUR 18.9 billion at 31 May 2023 to EUR 24.2 billion at 31 May 2024.

In an environment marked by a sharp rise in interest rates, a tense geopolitical situation and the spectre of a reversal in monetary policy via future rate cuts, the investment strategy pursued in the financial year by the BNP Paribas Insticash EUR 1D LVNAV sub-fund of the BNP Paribas Insticash SICAV consisted in maintaining significant cash holdings in order to handle flows at all times, diversifying issuers with the best ratings, building up short-term investments with terms ranging from one to three months, and taking advantage of market opportunities for longer-term investments of between six and twelve months with more attractive carry.

Compliance with the new liquidity ratios introduced in January 2019 (i.e. one-day threshold of 7.5% and one-week threshold of 15%) was ensured through cash at bank, investments in CDs, one-day deposits and reverse repos.

In terms of investment diversification, we always take care to maximise our diversification across better-rated issuers (bank and corporate) and regions.

We continued to pursue an active interest rate strategy through interest rate swaps and variable- or adjustable-rate investments, to protect some of the assets from interest rate risk.

The management policy pursued for the BNP Paribas Insticash EUR 1D LVNAV sub-fund (I+ units) resulted in a net increase of 3.91% in the net asset value over the financial year. This performance, established for the period from 1 June 2023 to 31 May 2024, is not a guide to future results. For reference, the arithmetic mean of the €STR (calculated using the OIS method) over the same period was 3.84%.

### BNP Paribas InstiCash EUR 3M

#### Monetary policy pursued by the European Central Bank (ECB) during the financial year

The European Central Bank (“ECB”) raised its three key rates by 25 bps in June, July and September, taking the deposit rate to 4.00%, the rate on the marginal lending facility to 4.75% and the rate on main refinancing operations to 4.50%. Since the start of the hikes in July 2022, rates have been raised by 450 bps. The ECB’s announcement suggested that this hike would be the last in this cycle, and subsequent comments indicated that the choice between leaving rates as they were and increasing them in September had been a difficult one, given the particularly uncertain environment.

At a press conference on 26 October, which accompanied what was then presented as a pause in tightening, Christine Lagarde acknowledged that the transmission of monetary policy was “forceful, dampening demand and thereby helping to push down inflation”. It soon became clear that the Governing Council was concerned about the downside risks to growth from weak domestic demand. In December, the ECB made a point of repeating that it was “too early to declare victory in the battle against inflation” because “domestic price pressures remain elevated, primarily owing to strong growth in unit labour costs”. The Governing Council also decided to advance the normalisation of the Eurosystem’s balance sheet by reducing the PEPP (pandemic emergency purchase programme) portfolio by an average of EUR 7.5 billion per month in the second half of 2024 and by discontinuing reinvestments at the end of 2024. In January and February, official comments were aimed at dialling down the expectations of a rapid cut in key rates that had emerged in late 2023. Christine Lagarde indicated that the consensus on the Board of Governors is that it was “premature to discuss rate cuts”. The minutes of the monetary policy meeting on 25 January showed that, given the uncertainty over future wage trends (and therefore inflation), the risk of cutting interest rates too early is considered greater than that of cutting them too late. In March, however, the general tone of the press release, the press conference and the new official forecasts (growth and inflation revised slightly downwards) confirmed that an initial cut in key rates should be announced in June. This commitment gathered strength with each passing week, but questions arose about the pace that would be adopted after this initial stage: while at the beginning of March the futures markets reflected a total of four 25-bp cuts over 2024, this number fell to three at the beginning of May and was just over two at the end of the month. The cautious statements made by Isabel Schnabel (warning of the risk of premature easing) and Philip Lane (emphasising the need to remain restrictive this year) contributed to these adjustments, as did economic growth indicators that were finally trending upwards.

#### Management policy

The sub-fund’s net assets dropped from EUR 5.493 billion at 31 May 2023 to EUR 7.618 billion at 31 May 2024.

In this environment of key interest rates, the investment strategy pursued during the financial year for the BNP Paribas Insticash EUR 3M sub-fund of the BNP Paribas Insticash SICAV consisted in hedging and/or neutralising the portfolio against rate hikes by purchasing swapped fixed-rate securities or floating-rate securities directly.

This strategy helped to maintain the portfolio’s weighted average maturity (“WAM”) to between 5 and 20 days. During the last quarter, we stopped hedging investments of less than three months, which contributed to an increase in the WAM to between 15 and 20 days. This shift in strategy reflects the persistent decline in inflation, the economic slowdown and, consequently, the end of the rise in key interest rates. In terms of credit duration, the portfolio’s WAL fluctuated between 100 and 170 days.

The money market reforms effective as of 21 January 2019 have set a one-day liquidity threshold of 7.5% for the sub-fund, and a one-week threshold of 15%. Compliance with these ratios is ensured through cash at bank, CDs and one-day deposits.

Beyond the regulatory thresholds, the sub-fund’s natural liquidity was ensured by investments in money market UCITS and fixed-rate negotiable debt securities maturing within six months.

In terms of investment diversification, we always take care to maximise our diversification across issuers (bank and corporate) and geographic regions.

We also increased our credit strategy by purchasing two-year adjustable-rate bonds in the primary market, which was mainly active during the first quarter of 2024.

The management policy pursued for BNP Paribas Insticash EUR 3M (I units) resulted in a net increase of +4.03% in the NAV over the financial year. This performance, established for the period from 31 May 2023 to 31 May 2024, is not a guide to future results. For reference, the weighted €STR benchmark rate (calculated using the OIS method) over the same period was +3.84%.

In accordance with the provisions of article 25 of the Code of Ethics for UCITS with regard to securities or products in which its founding group has an interest, please note that during the financial year, the FCP invested in certificates of deposit issued by the BNP PARIBAS group. We also used UCITS from the group’s range of money market instruments.

### BNP Paribas InstiCash GBP 1D LVNAV

#### Monetary policy pursued by the Bank of England (BoE) during the financial year

In June, the Bank of England (“BoE”) raised its base rate by 50 bps. The magnitude of this rise surprised investors, leading them to significantly revise their expectations of the terminal rate upwards, despite a rather divided Monetary Policy Committee, with two members voting for the status quo. On August 3, the BoE announced a 25 bp rise in its base rate to 5.25%, its highest level since April 2008, and expectations of continued tightening remained high. However, concerns arose that monetary policy might weigh more heavily on an already weakened economy. Comments by the BoE's chief economist suggested that the rate hike cycle could be paused, giving way to a long period of high interest rates. While market expectations in mid-August were that the base rate could be raised to 6.00% by the end of the year, these expectations receded following these words.

The status quo won out at the monetary policy meeting on 21 September, with 5 votes to 4 in favour of a 25 bp hike. All members agreed that the reduction in government bonds on the balance sheet would be GBP 100 billion over the next twelve months, a slightly faster pace than over the previous year. Although the Committee noted an easing in underlying inflation and signs of reduced labour market pressures, the statement did not come across as particularly dovish. The need to keep the rate unchanged for an extended period was reaffirmed in November, with the BoE highlighting the fact that high wage rises are posing an upside risk to inflation. However, the Monetary Policy Committee seems very pessimistic about growth, as domestic demand contracted in the third quarter. The inflation outlook has evolved over the months and in March, Governor Bailey said that he expected a “sharp drop” in April, which would show that the UK was converging towards the eurozone rate of inflation, i.e. towards the 2% target. Expectations regarding the monetary policy of the Bank of England (“BoE”) remained fluid, with investors placing a 50/50 chance on a base rate cut in June following an expected standstill in May. And in fact, the BoE left its base rate unchanged in May and suggested that a cut at the next meeting was likely. Two members favoured an immediate cut, while others felt they did not yet have enough information to adopt a less restrictive stance. However, the governor explained that by its next meeting on 20 June, the committee would be able to analyse two more months of indicators (especially on inflation and employment). Andrew Bailey noted that a June cut was not yet a “fait accompli” but stated at the same time that “It's likely that we will need to cut bank rates over the coming quarters and make monetary policy somewhat less restrictive over the forecast period, possibly more so than currently priced into market rates.” The announcement of snap elections in the UK on 4 July made it more difficult to take action in June, leading to further adjustments.

#### Management policy

The net assets of the BNP Paribas Insticash GBP 1D LVNAV sub-fund rose from GBP 2.670 billion at 31 May 2023 to GBP 2.811 billion at 31 May 2024.

The money market reforms effective as of 21 January 2019 have set a one-day liquidity threshold of 10% for the sub-fund, and a one-week threshold of 30%. Compliance with these ratios is largely ensured through cash at bank, overnight deposits, callable repos and investments with a term of one week.

During the financial year, we chose our investment policy to reflect our expectations about changes to the BoE's policy. In response to the sharp rise in inflation, the ECB began tightening monetary policy at the end of 2021 and has continued to do so ever since, raising its key rates at every meeting up until August before pausing for the first time in September 2023.

Our management strategy during the first part of the period involved neutralising our interest rate risk by systematically trading at variable rates directly or via hedging swaps. As the market now anticipates rate cuts starting in the summer, we are exposed to fixed rates on short maturities but remain exposed to variable rates on longer maturities.

As credit spreads have tightened sharply since the start of the year, we followed the market by selecting the most attractive spreads on the one-year pillar and maintaining a WAL of around 70 days, even though most of our investments were concentrated on three-month maturities. We have also maintained large pockets of liquidity to manage the volatility of our assets. We also endeavoured to diversify in terms of issuers and geographic regions as much as possible.

The management policy pursued for the BNP Paribas Insticash GBP 1D LVNAV sub-fund (I Distribution units) resulted in a net increase of 5.27% in the NAV over the financial year. This performance, established for the period from 31 May 2023 to 31 May 2024, is not a guide to future results. For reference, the arithmetic mean of the Sonia (calculated using the OIS method) over the same period was 5.17%.

## Manager's report

---

### BNP Paribas InstiCash USD 1D LVNAV

#### Monetary policy pursued by the Fed during the financial year

The US Federal Reserve (“Fed”) began the period under review with a pause in its monetary tightening cycle in June, followed by a final 25 bp increase after the meeting of the Federal Open Market Committee (“FOMC”) on 25 and 26 July. Since tightening began in March 2022, the target rate for federal funds was raised to between 5.25% and 5.50%, a tightening of 525 bps. The Fed’s stance became much more accommodative between September (when the decision not to raise key interest rates could still be interpreted as a further pause in the cycle) and November. This resulted in expectations of a rapid cut in key rates in 2024. Robust GDP growth in the third quarter and the slowdown in inflation convinced investors that a very favourable scenario could be on the cards.

In December, Jerome Powell signalled that monetary policy was now “well into restrictive territory”. Furthermore, projections for the level of the federal funds rate considered “appropriate” by FOMC members revealed that an easing of monetary policy could become a reality in the first half of 2024. Expectations of a rapid cut in key rates in 2024, already high before the December meeting, then took off. By the end of 2023, the Overnight Indexed Swap (“OIS”) market suggested the equivalent of seven cuts of 25 bps in 2024, with a high probability of a first cut in March. At the very beginning of 2024, Jerome Powell tempered these expectations. Then, faced with the resilience of the US economy and unexpectedly high price indices, he had to reassure the public that key interest rates would be cut in 2024, while acknowledging at the end of March that “right now, the economy and the labour market are strong”. Expectations for cuts in key rates (as reflected by the futures markets) shifted constantly during 2024: the total number of rate cuts expected in 2024, as reflected by the futures markets, gradually declined to below two on 11 April following the release of a better-than-expected Consumer Price Index. The number of cuts then fluctuated between one and two, depending on the economic indicators, and many economists are now ruling out any cuts before September.

#### Management policy

The net assets of the BNP Paribas Insticash USD 1D LVNAV sub-fund increased from USD 7.15 billion at 31 May 2023 to USD 12.04 billion at 31 May 2024.

The money market reforms effective as of 21 January 2019 have set a one-day liquidity threshold of 10% for the sub-fund, and a one-week threshold of 30%. Compliance with these ratios is largely ensured through cash at bank, overnight CD deposits, one-day deposits, reverse repos and investments with a term of one week.

In an environment marked by a sharp rise in interest rates, a tense geopolitical situation and the spectre of a readjustment in monetary policy via future rate cuts, the investment strategy pursued in the financial year by the BNP Paribas Insticash USD 1D LVNAV sub-fund of the BNP Paribas Insticash SICAV consisted in maintaining significant cash holdings concentrating investments with terms ranging from zero to three months, and taking advantage of market opportunities for longer-term investments of between six and twelve months with more attractive carry. We also continued to diversify in terms of issuers and geographical regions outside China.

We pursued an active interest rate risk management strategy by focusing on long-term investments (six months to one year) with a variable rate or hedged via interest-rate swaps to mitigate risk while benefiting from a better carry.

The management policy pursued for the BNP Paribas Insticash USD 1D LVNAV - Institutional Capital Share VNAV sub-fund during the past half year resulted in a net increase of 5.57% in the NAV. This performance, established for the period from 1 June 2023 to 31 May 2024, is not a guide to future results. For reference, the compounded overnight federal funds rate (calculated using the OIS method) over the same period was 5.43%.

The Board of Directors

Luxembourg, 3 July 2024

## **Audit report**

To the Shareholders of  
**BNP Paribas InstiCash**

---

### **Our opinion**

In our opinion, the accompanying financial statements give a true and fair view of the financial position of BNP Paribas InstiCash (the “Fund”) and of each of its sub-funds as at 31 May 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund’s financial statements comprise:

- the statement of net assets as at 31 May 2024;
- the statement of operations and changes in net assets for the year then ended;
- the securities portfolio as at 31 May 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

### **Basis for opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### **Other information**

The Board of Directors is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

---

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg  
T : +352 494848 1, F : +352 494848 2900, [www.pwc.lu](http://www.pwc.lu)*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)  
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

#### **Responsibilities of the Board of Directors for the financial statements**

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

#### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;

- conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative

BNP Paribas InstiCash GBP 1D LVNAV	1 February 2024	Launch of the share class “Classic Plus - Capitalisation”
BNP Paribas InstiCash USD 1D LVNAV	2 February 2024	Launch of the share class Share “Classic Plus - Capitalisation”
BNP Paribas InstiCash EUR 1D LVNAV	1 March 2024	Launch of the share class “Classic Plus - Capitalisation”
BNP Paribas InstiCash EUR 1D LVNAV	12 March 2024	Launch of the share classes “I - Distribution”, “I Plus - Distribution” and “S - Distribution”
BNP Paribas InstiCash USD 1D LVNAV	3 April 2024	NAV split by 100 of the share class “U2 - Capitalisation”

**Sub-funds open**

On 31 May 2024, the Company comprised four sub-funds, all of them being open for subscriptions:

BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D), expressed in Euro (EUR);

BNP Paribas InstiCash EUR 3M, expressed in Euro (EUR);

BNP Paribas InstiCash GBP 1D LVNAV, expressed in Pound Sterling (GBP);

BNP Paribas InstiCash USD 1D LVNAV, expressed in United States Dollar (USD).

**2) The investment objective**

The investment objective of the sub-fund BNP Paribas InstiCash EUR 3M seeks to achieve the best possible return in EUR in line with prevailing money market rates, over a 3-month period while aiming to preserve capital consistent with such rates and to maintain a high degree of liquidity and diversification; the 3-month period corresponds to the recommended investment horizon of the sub-fund.

The investment objective of the sub-funds BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D), BNP Paribas InstiCash GBP 1D LVNAV and BNP Paribas InstiCash USD 1D LVNAV seek to achieve the best possible return in the sub-funds' currencies in line with prevailing money market rates, over a 1-day period while aiming to preserve capital consistent with such rates and to maintain a high degree of liquidity and diversification; the 1-day period corresponds to the recommended investment horizon of the sub-fund.

---

## Notes to the financial statements at 31/05/2024

---

### 3) *The investment Policy*

The sub-fund BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D) is short-term low volatility\* net asset value money market fund as defined in Regulation 2017/1131. The sub-fund is rated AAAm by S&P Global Ratings. This rating was solicited and financed by the Management Company. It is subject to a periodic review conducted by Standard & Poor's.

The sub-fund BNP Paribas InstiCash EUR 3M is a standard variable net asset value money market fund as defined by Regulation 2017/1131.

The sub-fund BNP Paribas InstiCash EUR 3M invests in a diversified portfolio of the sub-fund's currency denominated money market instruments, deposits with credit institutions, repurchase agreements and reverse repurchase agreements, units or shares of short-term MMFs or other Standard MMFs and ancillary liquid assets denominated in the sub-fund's currency.

The sub-fund BNP Paribas InstiCash GBP 1D LVNAV is short-term low volatility net asset value money market fund as defined by Regulation 2017/1131. The sub-fund is rated AAAm by S&P Global Ratings. This rating was solicited and financed by the Management Company. It is subject to a periodic review conducted by Standard & Poor's.

The sub-fund BNP Paribas InstiCash USD 1D LVNAV is short-term low volatility net asset value money market fund as defined by Regulation 2017/1131. The sub-fund is rated AAAm by S&P Global Ratings and Fitch. This rating was solicited and financed by the Management Company. It is subject to a periodic review conducted by Standard & Poor's and Fitch.

The sub-funds BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D), BNP Paribas InstiCash GBP 1D LVNAV and BNP Paribas InstiCash USD 1D LVNAV invest within the limits set out in Appendix 1 of Book 1 of the Prospectus dated from February 2024 in a diversified portfolio of the sub-funds' currencies denominated money market instruments, deposits with credit institutions, repurchase agreements and reverse repurchase agreements, units or shares of other short-term MMFs and ancillary liquid assets denominated in the sub-funds' currencies.

Financial derivative instruments are used only for the purpose of hedging the interest rate of the sub-funds. The impact of these financial derivative instruments will be taken into account for the calculation of the Weighted Average Maturity (WAM).

These investments must fulfill the Portfolio rules and credit quality assessment as set out in the Prospectus.

In accordance with Regulation 2017/1131 and Regulation 2015/2365, reverse repurchase agreements will be used on a continuous basis, for liquidity management purpose. At the date of the Prospectus (February 2024), these instruments will be used according to the proportions described below:

- expected :
  - 30% for the sub-funds BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D), BNP Paribas InstiCash GBP 1D LVNAV and BNP Paribas InstiCash USD 1D LVNAV;
  - 5% for the sub-fund BNP Paribas InstiCash EUR 3M
- maximum : 90%

## **Note 2 - Principal accounting methods**

The financial statements of the Company are made in accordance with the regulatory requirements and the accounting policies generally admitted in the Grand Duchy of Luxembourg. The financial statements are prepared on a going concern basis. The financial statements of BNP Paribas InstiCash represent the sum of the financial statements of each sub-fund of the Company.

These financial statements have been drawn up in euros (EUR) by converting the financial statements of each sub-fund using the exchange rates in effect at the balance sheet date (see Note 9). The financial statements of the Company have been drawn up on the basis of the last net asset value calculated during the financial year.

### *a) Net asset value*

This annual report is prepared on the basis of the last net asset value as at 31 May 2024.

---

\* Until 29 February 2024: short-term variable.

---

Notes to the financial statements at 31/05/2024

---

**b) Foreign currencies**

The financial statements of each sub-fund of the Company are expressed in the working currency of the sub-fund and its accounting records are kept in that currency. Assets and liabilities in other currencies are recorded in the currency of the sub-fund based on the exchange rate in effect in Luxembourg on the Valuation Day. Income and expenses in other currencies are recorded in the currency of the sub-fund based on the exchange rate in effect at the date of the transaction.

The resulting exchange differences are recorded in the statement of operations and changes in net assets.

The combined accounts are expressed in Euros (EUR) and are provided for information purposes only. For the purposes of consolidation the corresponding items in the statements of the sub-fund are converted into euros at the exchange rates prevailing at balance sheet date.

**c) Valuation of investments**

The valuation of all securities listed on a stock exchange or any other regulated market, which functions regularly, is recognised and accessible to the public, is based on the last known closing price on the valuation day, and, if the securities concerned are traded on several markets, on the basis of the last known closing price on the major market on which they are traded; if this price is not a true reflection, the valuation shall be based on the probable sale price estimated by the Board of Directors in a prudent and bona fide manner.

Only good quality market data shall be used and such data shall be assessed on the basis of all of the following factors:

- (i) the number and quality of counterparties
- (ii) the volume and turnover in the market of the asset of the sub-fund
- (iii) the issue size and the portion of the issue that the sub-fund plans to buy or sell

Unlisted securities or securities not traded on a stock exchange or another regulated market which functions in a regular manner is recognized and accessible to the public, shall be valued on the basis of the probable sale price estimated in a prudent and bona fide manner by a qualified professional appointed for this purpose by the Board of Directors.

Where use of mark-to-market is not possible or the market data is not of sufficient quality, an asset of a sub-fund, liquid assets, money market instruments and all other instruments may be valued at their mark-to-model value. The Board of Directors will put in place appropriate checks and controls concerning the valuation of the instruments

The shares of a sub-fund shall be issued or redeemed at a price that is equal to the sub-fund's NAV per unit or share, notwithstanding permitted fees or charges as described in the Prospectus of the sub-fund. By way of derogation the shares of a LVNAV sub-fund may be issued or redeemed at a price equal to that sub-fund's constant NAV per share, but only where the constant NAV per share, which is calculated in accordance with Article 32(1), (2) and (3) of Regulation 2017/1131, does not deviate from the NAV per share calculated in accordance with Article 30 of Regulation 2017/1131 by more than 20 basis points. When the constant NAV per share calculated in accordance with Article 32(1), (2) and (3) of Regulation 2017/1131 deviates from the NAV per share calculated in accordance with Article 30 of Regulation 2017/1131 by more than 20 basis points, the following redemption or subscription shall be undertaken at a price that is equal to the NAV per share calculated in accordance with Article 30 of Regulation 2017/1131.

The Board of Directors is authorised to draw up or amend the rules in respect of the relevant valuation rates and in the limits permitted by the Regulation 2017/1131.

The results of the valuation according to the linear amortisation method are included under the heading "Other assets" in the statement of net assets and under the heading "Income on investments and assets, net" in the statement of operations and changes in net assets.

---

Notes to the financial statements at 31/05/2024

---

**d) Interest**

Interest is recognized on a prorata basis after deduction of any withholding taxes that may be applicable.

**e) Valuation of Swap transactions**

Swap transactions on interest rates are valued at their market value established by reference to the applicable curve of the interest rates. Swap transactions on financial instruments or indices are valued at their market value established by reference to the financial instruments or indices concerned. Valuation of the swap contracts relating to said financial instruments or indices is based on the market value of the swap transactions, in accordance with the procedures laid down by the Board of Directors.

The interest receivable and payable on swap transactions is included in the statement of net assets under the heading "Other assets" or "Other liabilities" and in the statement of operations and changes in net assets under the heading "Income on investments and assets, net" or "Interest on swaps".

**f) Valuation of reverse repurchase transactions**

Reverse repurchase transactions are valued at their purchase value plus interest accrued since the purchase date.

**g) Technical performance provision**

In order to achieve the management objective for money market funds as defined in the prospectus, the management company may be required - on an ad hoc basis - to set aside amounts based on the performance of the net asset value in order to reduce the volatility of certain securities held in the portfolio. This adjustment may not exceed 5 bps of the fund's net assets. The amounts set aside will be reinvested subject to how the assets perform, as well as the average performance of the portfolio.

**h) Cross-investments**

The value of the cross-investments of the sub-funds has not been deducted for the calculation of the combined total net assets of the Company.

The total value of those cross-investments as at 31 May 2024 amounted to:

<b>Sub-funds investing in other BNP PARIBAS INSTICASH sub-funds</b>	<b>Sub-funds held by other BNP PARIBAS INSTICASH sub-funds</b>	<b>Currency of the sub-fund investing</b>	<b>Market value (in EUR)</b>
BNP Paribas InstiCash EUR 3M	BNP Paribas InstiCash EUR 1D LVNAV	EUR	150 239 172
		<b>Total:</b>	<b>150 239 172</b>

The net assets at the end of the financial year of combined figures would be EUR 46 053 207 127 without taking into account the cross-investments values.

Notes to the financial statements at 31/05/2024

**Note 3 - Management fees (maximum per annum)**

Management fees are calculated daily and paid monthly from the average net assets of a sub-fund, share category, or share class, paid to the Management Company and serve to cover remuneration of the Investment Managers and also distributors in connection with the marketing of the Company's stock.

The management fees applicable to the “Classic” category are applicable to all share sub-categories and classes with the word “Classic” in their denomination.

The management fees applicable to the “I” category are applicable to all share sub-categories and classes with the word “I” in their denomination.

The management fees applicable to the “I Plus” category are applicable to all share sub-categories and classes with the word “I Plus” in their denomination.

The management fees applicable to the “Privilege” category are applicable to all share sub-categories and classes with the word “Privilege” in their denomination.

The management fees applicable to the “S” category are applicable to all share sub-categories and classes with the word “S” in their denomination.

The management fees applicable to the “U” category are applicable to all share sub-categories and classes with the word “U” in their denomination.

No management fee is applied to the “X” class.

Sub-fund	Classic	Classic Plus	Privilege	I	I Plus	S	U
BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D)	0.35%	0.25%	0.20%	0.15%	0.10%	0.15%	N/A
BNP Paribas InstiCash EUR 3M	0.35%	0.25%	0.20%	0.15%	0.10%	N/A	0.15%
BNP Paribas InstiCash GBP 1D LVNAV	0.35%	0.25%	0.20%	0.15%	0.10%	0.15%	N/A
BNP Paribas InstiCash USD 1D LVNAV	0.35%	0.25%	0.20%	0.15%	0.10%	0.15%	0.35%

**Note 4 - Other fees**

Other fees are calculated daily and paid monthly from the average net assets of a sub-fund, share category or share class and serve to cover notably the following services:

- administration, domiciliary and fund accounting
- audit
- custody, depositary and safekeeping
- documentation, such as preparing, printing, translating and distributing the Prospectus, KIDs, financial reports
- ESG certification and service fees
- financial index licensing (if applicable)
- legal expenses
- listing of shares on a stock exchange (if applicable)
- management company expenses (including among other AML/CFT, KYC, Risk and oversight of delegated activities)
- marketing operations
- publishing fund performance data
- registration expenses including translation
- services associated with the required collection, tax and regulatory reporting, and publication of data about the Company, its investments and shareholders
- transfer, registrar and payment agency

These fees do not include fees paid to independent Directors and reasonable out-of-pocket expenses paid to all Directors, expenses for operating hedged shares, duties, taxes and transaction costs associated with buying and selling assets, brokerage and other transactions fees, rating agencies fees, interest and bank fees.

---

Notes to the financial statements at 31/05/2024

---

## Note 5 - Taxes

At the date of the Prospectus (February 2024), the Company is not liable to any Luxembourg income tax or capital gains tax.

The Company is liable to an annual “*taxe d’abonnement*” in Luxembourg representing 0.05% of the net asset value. This rate is reduced to 0.01% for:

- a) sub-funds with the exclusive objective of collective investments in money market instruments and deposits with credit institutions;
- b) sub-funds with the exclusive objective of collective investments with credit institutions;
- c) sub-funds, categories, or classes reserved for Institutional Investors, Managers, and UCIs.

The following are exempt from this “*taxe d’abonnement*”:

- a) the value of assets represented by units, or shares in other UCIs, provided that these units or shares have already been subject to the “*taxe d’abonnement*”;
- b) sub-funds, categories, and/or classes:
  - i. whose securities are reserved to Institutional Investors, Managers, or UCIs and
  - ii. whose sole object is the collective investment in money market instruments and the placing of deposits with credit institutions, and
  - iii. whose weighted residual portfolio maturity does not exceed 90 days, and
  - iv. that have obtained the highest possible rating from a recognized rating agency;
- c) sub-funds, share categories and/or classes reserved to:
  - i. institutions for occupational retirement pension or similar investment vehicles, set up at the initiative of one or more employers for the benefit of their employees, and
  - ii. companies having one or more employers investing funds to provide pension benefits to their employees;
- d) sub-funds whose main objective is investment in microfinance institutions;
- e) sub-funds, shares categories and/or classes:
  - i. whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly that is recognized and open to the public, and
  - ii. whose exclusive object is to replicate the performance of one or several indices.

When due, the “*taxe d’abonnement*” is payable quarterly based on the relevant net assets and calculated at the end of the quarter for which it is applicable.

In addition, the Company may be subject to foreign UCI’s tax, and/or other regulators levy, in the country where the sub-fund is registered for distribution.

### Taxation of the Company’s investments

Some of the Company’s portfolio income, especially income on dividends and interest, as well as certain capital gains, may be subject to tax at various rates and of different types in the countries in which they are generated. This income and capital gains may also be subject to withholding tax. Under certain circumstances, the Company may not be eligible for the international agreements preventing double taxation that exist between the Grand Duchy of Luxembourg and other countries. Some countries will only consider that persons taxable in Luxembourg qualify under these agreements.

---

Notes to the financial statements at 31/05/2024

---

**Taxation of shareholders**

a) Residents of the Grand Duchy of Luxembourg

On the date of the Prospectus (February 2024), the dividends earned and capital gains made on the sale of shares by residents of the Grand Duchy of Luxembourg are not subject to withholding tax.

Dividends are subject to income tax at a personal tax rate.

Capital gains made on the sale of shares are not subject to income tax if the shares are held for a period of over six months, except in the case of resident shareholders holding over 10% of the shares of the Company.

b) Non-residents of the Grand Duchy of Luxembourg

In principle, according to current law and in the event that the provisions of Directive 2011/16 as specified in item c) below do not apply:

- the dividends earned and the capital gains made on the sale of shares by non-residents are not subject to withholding tax;
- the capital gains made by non-residents on the sale of shares are not subject to Luxembourg income tax.

Nevertheless, if there is a dual tax convention between the Grand Duchy of Luxembourg and the shareholder's country of residence, the capital gains made on the sale of shares are tax-exempt in principle in Luxembourg, with the taxation authority being attributed to the shareholder's country of residence.

c) Residents of another member state of the European Union, including the French overseas departments, the Azores, Madeira, the Canary Islands, the Åland Islands and Gibraltar.

Any individual who receives dividends from the Company or the proceeds from the sale of shares in the Company through a paying agent based in a state other than the one in which he resides is advised to seek information on the legal and regulatory provisions applicable to him.

Most countries covered by Directive 2011/16 and 2014/107 will report to the tax authorities in the state of residence of the beneficial owner of the income the total gross amount relating to the amount distributed by the Company and/or the total gross proceeds from the sale, refund or redemption of shares in the Company. Austria and Switzerland will apply the exchange of information as of 1<sup>st</sup> January 2018 on the basis of the data collected in 2017.

d) Residents of third countries or territories

No withholding tax is levied on interest paid to residents of third countries or territories. Nevertheless, in the framework of Automatic Exchange of Information package (AEOI) covering fiscal matters elaborated by OECD, the Company may need to collect and disclose information about its shareholders to third parties, including the tax authorities of the participating country in which the beneficiary is tax resident, for the purpose of onward transmission to the relevant jurisdictions. The data of financial and personal information as defined by this regulation which will be disclosed may include (but is not limited to) the identity of the shareholders and their direct or indirect beneficiaries, beneficial owners and controlling persons. A shareholder will therefore be required to comply with any reasonable request from the Company for such information, to allow the Company to comply with its reporting requirements. The list of AEOI participating countries is available on the website: <http://www.oecd.org/tax/automatic-exchange/>

e) US Tax

Under the Foreign Account Tax Compliance Act ("FATCA") provisions coming into force as from 1 July 2014, in the case the Company invests directly or indirectly in US assets, income received from such US investments could be subject to a 30% US withholding tax.

To avoid such withholding tax the United States have entered, on 28 March 2014, into an intergovernmental agreement (the "IGA") with the Grand Duchy of Luxembourg under which the Luxembourg financial institutions undertake due diligence to report certain information on their direct or indirect U.S. investors to the Luxembourg Tax authorities. Such information will be onward reported by the Luxembourg tax authorities to the U.S. Internal Revenue Services ("IRS").

The foregoing provisions are based on the Law and practices currently in force, and are subject to change. Potential investors are advised to seek information in their country of origin, place of residence or domicile on the possible tax consequences associated with their investment. The attention of investors is also drawn to certain tax provisions specific to individual countries in which the Company publicly markets its shares.

---

Notes to the financial statements at 31/05/2024

---

### Note 6 - Distribution fees

Distribution fees are calculated daily and paid monthly from the average net assets of a sub-fund, share category, or share class. They are paid to the Management Company and serve to cover the remuneration of the distributors, being supplemental to the share of the management fee that they receive.

### Note 7 - Reverse repurchase agreements

In accordance with the Circulars 08/356 and 14/592, each sub-fund may engage in reverse repurchase agreements. Reverse repurchase agreements consist of a forward transaction at the maturity of which the seller (counterparty) has the obligation to repurchase the asset sold and the sub-fund the obligation to return the asset received under the transaction.

A reverse repurchase agreement shall be eligible to be entered into by a sub-fund provided that all of the following conditions are fulfilled:

- a) the sub-fund has the right to terminate the agreement at any time upon giving prior notice of no more than two working days;
- b) the market value of the assets received as part of the reverse repurchase agreement is at all times at least equal to the value of the cash paid out.

The assets received by a sub-fund as part of a reverse repurchase agreement shall be money market instruments that fulfil the requirements set out above and shall not be sold, reinvested, pledged or otherwise transferred.

The assets received by a sub-fund as part of a reverse repurchase agreement shall be sufficiently diversified with a maximum exposure to a given issuer of 15% of the NAV of the sub-fund, except where those assets take the form of money market instruments that fulfil the requirements of point 2 (ii) of Diversification Rules of the Prospectus. The assets received in this context shall be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.

A sub-fund that enters into a reverse repurchase agreement shall ensure that it is able to recall the full amount of cash at any time on either an accrued basis or a mark-to-market basis. When the cash is callable at any time on a mark-to-market basis, the mark-to-market value of the reverse repurchase agreement shall be used for the calculation of the NAV of the sub-fund.

By way of derogation from point above, a sub-fund may receive as part of a reverse repurchase agreement liquid transferable securities or money market instruments other than those that fulfil the requirements set out in point above provided that those assets comply with one of the following conditions:

- a) they are issued or guaranteed by the European Union, a central authority or central bank of a Member State, the European Central Bank, the European Investment Bank, the European Stability Mechanism or the European Financial Stability Facility provided that a favourable assessment has been received regarding the credit quality assessment. The assets received as part of a reverse repurchase agreement in this respect shall be disclosed to the shareholders and shall fulfil the requirements of point 2 (ii) of Diversification Rules of the Prospectus.
- b) they are issued or guaranteed by a central authority or central bank of a Third Country, provided that a favourable assessment has been received regarding the credit quality assessment.

The maximum proportion of assets that can be subject to reverse repurchase agreements and the expected proportion of assets that are subject to them are mentioned in Book 2 for each sub-fund of the Prospectus.

For the sub-fund BNP Paribas InstiCash EUR 1D LVNAV (formerly BNP Paribas InstiCash EUR 1D), the account "Income on investments and assets, net" includes an amount of EUR 90 542 883 relating to interest collected on reverse repurchased transactions.

For the sub-fund BNP Paribas InstiCash EUR 3M, the account "Income on investments and assets, net" includes an amount of EUR 7 103 451 relating to interest collected on reverse repurchased transactions.

For the sub-fund BNP Paribas InstiCash GBP 1D LVNAV, the account "Income on investments and assets, net" includes an amount of GBP 11 064 251 relating to interest collected on reverse repurchase transactions.

For the sub-fund BNP Paribas InstiCash USD 1D LVNAV, the account "Income on investments and assets, net" includes an amount of USD 22 681 451 relating to interest collected on reverse repurchase transactions.

# BNP PARIBAS INSTICASH

## Notes to the financial statements at 31/05/2024

Notes to the financial statements at 31/05/2024

**Counterparties to reverse repurchase agreements:**

BNP PARIBAS LUXEMBOURG  
 BNP PARIBAS PARIS  
 CITIGROUP AG  
 HSBC FRANCE  
 JP MORGAN AG  
 LA BANQUE POSTALE

**Note 8 - Share currencies**

The net asset value per share is priced in the currency of the share class and not in the currency of the sub-fund in the section “Key figures relating to the last 3 years”.

**Note 9 - Exchange rates**

The exchange rates used for consolidation and for share classes denominated in a currency other than the reference currency of the relevant sub-fund as at 31 May 2024 were the following:

EUR 1 = GBP 0.85265  
 EUR 1 = USD 1.08560

**Note 10 - Swaps**

**Interest Rate Swaps**

The Company has entered into interest rate swaps agreements whereby it exchanges fixed income (sum of the notional amount and the fixed rate) for variable income (sum of the notional amount and the floating rate) and vice versa. These amounts are calculated and recognised at each calculation of the Net Asset Value; the receivable amount is stated under “Other assets” in the Statement of net assets, while the payable amount is given under “Other liabilities” in the Statement of net assets.

### Note 13 - List of Investment managers

As at 31 May 2024, all opened sub-funds are managed by BNP PARIBAS ASSET MANAGEMENT Europe\*.

\*As at 1 March 2024, the Company BNP PARIBAS ASSET MANAGEMENT France was renamed BNP PARIBAS ASSET MANAGEMENT Europe.

---

Notes to the financial statements at 31/05/2024

---

**Note 14 - Transaction fees**

Transaction fees incurred by the Company relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of standard fees, sundry fees on transaction, stamp fees, brokerage fees, custody fees, VAT, stock exchange fees, RTO fees (Reception and Transmission of Orders) and dilution levy. In line with bond market practice, a bid-offer spread is applied when buying or selling securities and other financial instruments. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's remuneration. The bid-offer spread is not included in the caption "transaction fees" of the "statement of operations and of changes in net assets".

For the financial year from 1 June 2023 until 31 May 2024, no transaction fees were incurred by the Company.

**Note 15 - Significant event**

Since 24 February 2022 the Board of Directors has been very attentive to the consequences of the conflict between Russia and Ukraine and its impact on the energy shortage and food supplies in Europe. The Board of Directors closely monitors developments in terms of geopolitical events and their impact on global outlook market and financial risks in order to take all necessary measures in the interest of shareholders.

**Note 16 - SFDR Statement**

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the (unaudited) Sustainable Finance Disclosure Regulation section.

## Unaudited appendix

### Global market risk exposure

As regards to risk management, the Board of Directors of the Company decided to adopt the commitment approach as a method to determine the global market risk exposure for all sub-funds.

### Information on the Remuneration Policy in effect within the Management Company

Below are the quantitative information on remuneration, as required by Article 22 of the AIFM directive (Directive 2011/ 61 / EC of 8 June 2011) and by Article 69 (3) of the UCITS V directive (Directive 2014/91/EU of 23 July 2014), in a format compliant with the recommendations of the AFG (French Asset Management Association)<sup>1</sup>.

#### **Aggregate remuneration of members of staff of BNPP AM Luxembourg (art 22-2-e of AIFM directive and art 69-3 (a) of the UCITS V directive):**

	Number of staff	Total remuneration (K EUR) (fixed + variable)	of which total variable remuneration (K EUR)
All employees of BNPP AM Luxembourg	101	9 906	1 117

#### **Aggregate remuneration of members of staff of BNPP AM Luxembourg whose activity have a material impact on the risk profile of the firm and who are indeed “Identified Staff”<sup>2</sup> (art 22-2-f of AIFM directive and art 69-3 (b) of the UCITS V directive):**

Business Area	Number of staff	Total Remuneration (kEUR)
Identified Staff of BNPP AM Luxembourg: <i>of which AIF/ UCITS and European mandates Portfolio managers</i>	4 -	919 -

### **Other information:**

#### ➤ **Number of AIF and UCITS Funds under management of BNPP AM Luxembourg:**

	Number of funds as at 31/12/2023	AuM (billion EUR) as at 31/12/2023 <sup>3</sup>
UCITS	193	132
AIF	20	3

- Under the supervision of the BNP PARIBAS ASSET MANAGEMENT Holding’s remuneration committee and its board of directors, an independent and central audit of the Global BNP Paribas Asset Management remuneration policy and its implementation over the 2022 financial year was conducted between July and September 2023. The results of this audit, which covered BNP Paribas Asset Management entities with an AIFM and/or UCITS license, was rated “Generally Satisfactory” highlighting the solidity of the measures in place, particularly during its key steps: identification of regulated employees, consistency of remuneration with performance, application of regulatory deferral rules, implementation of indexation and deferral mechanisms. A recommendation -not qualified as an alert- was issued in 2023, signalling that the framework surrounding remuneration policies for external delegated management companies did not ensure sufficient alignment with regulatory requirements and needed to be more documented.
- More information on the determination of the variable remuneration is set out in the qualitative disclosure on the remuneration policy, which is available on the website of the company.

<sup>1</sup>NB: The remuneration amounts above are not directly reconcilable with the accounting data of the year, as they reflect the annual salary base of staff as at 31 December 2023, and amounts allocated at the closing of the annual variable compensation review process in March 2024, whether this variable remuneration is deferred or not.

<sup>2</sup>The list of Identified Staff is determined based on end of year review.

<sup>3</sup>The communicated amounts include master-feeder funds.

This type of transactions has generated USD 22 681 451 i.e. 5.33% of the global revenues for the sub-fund.

Note that all Reverse Repurchase agreements are settled on a bilateral mode.

**Transparency of the promotion of environmental or social characteristics and of sustainable investments**

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the (unaudited) Sustainable Finance Disclosure Regulation section.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : BNP PARIBAS INSTICASH EUR 1D LVNAV

Legal Entity Identifier: 2138001R1QDBM3JGK082

## ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investment with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective** : \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **19.6%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

#### Corporate issuers

The investment strategy selects:

Corporate issuers with good or improving ESG practices within their sector of activity. The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity)
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

### **Sovereign issuers**

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital
- Governance: business rights, corruption, democratic life, political stability, security

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

● **How did the sustainability indicators perform?**

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the financial product:

- The percentage of the financial product’s portfolio compliant with the RBC Policy: **100%**
- The percentage of the financial product’s portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **100%**
- The weighted average ESG score of the financial product’s portfolio compared to the weighted average ESG score of its investment universe: **60.2 vs 53.4 (Bloomberg Barclays Multiverse 1-3Y (USD) RI)**
- The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **19.6%**

● **...and compared to previous periods ?**

Indicator	2022*	2023**	Comparison
The percentage of the financial product’s portfolio compliant with the RBC policy	100%	100%	In line with the financial product’s commitment
The percentage of the portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	100%	100%	In line with the financial product’s commitment
The weighted average ESG score of the portfolio compared to the weighted average ESG score of its investment universe	59.5 vs 53.1	60.2 vs 53.4	In line with the financial product’s commitment
The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	23.4%	19.6%	In line with the financial product’s commitment

\*Figures reported in 2022 were calculated on the closing date of the accounting year

\*\* Figures reported in 2023 are expressed as a quarterly weighted average.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology, as defined in the main part of the Prospectus, integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;

b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.

3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the BNPP AM ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;

b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The proportion of investments of the financial product made in economic activities and that qualify as sustainable investments under the SFDR may contribute to the environmental objectives as defined under Taxonomy Regulation: climate change mitigation and climate change adaptation.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The investment manager ensures that throughout its investment process, the financial product takes into account all the principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process : RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

As regards the sustainable investments that the financial product intends to make, the following principal adverse sustainability impacts are taken into account:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The investment universe of the financial product is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors ?

The product considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the financial product's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies

4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

## What were the top investments of this financial product?

Largest investments**	Sector	% Assets*	Country**
TD BANCO SANTANDER SA 31-AUG-2023	Financials	2.35%	Spain

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

\* Any percentage differences with the financial statement portfolios result from a rounding difference.

\*\* Any difference with the portfolio statements above are coming from the use of different data's sources.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.06.2023 to 31.05.2024

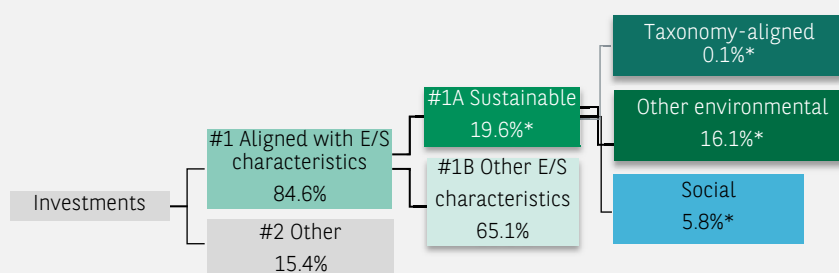

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation ?

The proportion of the investments of the financial product used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is **84.6%**.

The proportion of sustainable investments of the financial product is **19.6%**.

The remaining proportion of the investments is mainly used as described under the question: " What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

\*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

● *In which economic sectors were the investments made ?*

Sectors	% Asset
Financials	92.82%
Other	8.26%
Consumer Discretionary	2.23%
Consumer Staples	1.87%
Energy	0.88%
Integrated Oil & Gas	0.73%
Oil & Gas Exploration & Production	0.15%
Industrials	0.67%
Materials	0.49%
Health Care	0.21%
Utilities	0.20%
Cash	-7.64%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.  
The largest investments are based on official accounting data and are based on the transaction date.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The financial product did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The management company uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/OEE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?**

- Yes:
  - In fossil gas
  - In nuclear energy
- No:

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* Real taxonomy aligned

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

Revenue	
2022*	0.1%
2023**	0.1%

\*Figures reported in 2022 were calculated on the closing date of the accounting year

\*\* Figures reported in 2023 are expressed as a quarterly weighted average.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **16.1%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

Socially sustainable investments represent **5.8%** of the financial product.

### What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- The proportion of assets that are not used to meet the environmental or social characteristics promoted by the financial product. These assets are used for investment purposes, or
- Instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards:

- The risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- The RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The financial product shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

More information on the RBC Policy, and in particular criteria relating to sectoral exclusions, can be found on the website of the investment manager: Sustainability documents - BNPP AM Corporate English (<https://www.bnpparibas-am.com/sustainability-documents/>)

- The financial product shall have the weighted average ESG score of its portfolio higher than the average weighted ESG score of its investment universe
- The financial product shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the proprietary ESG methodology
- The financial product shall invest at least 10% of its assets in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation. Criteria to qualify an investment as 'sustainable investment' are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and the quantitative and qualitative thresholds are mentioned in the main part of the Prospectus

In addition, the management company has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

## How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

- *How does the reference benchmark differ from a broad market index?*  
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
Not applicable
- *How did this financial product perform compared with the reference benchmark?*  
Not applicable
- *How did this financial product perform compared with the broad market index?*  
Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : BNP PARIBAS INSTICASH EUR 3M

Legal Entity Identifier: 213800M1VBLOS4LZDA08

## ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investment with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective** : \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **28.6%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

#### Corporate issuers

The investment strategy selects:

Corporate issuers with good or improving ESG practices within their sector of activity. The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity)
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

### **Sovereign issuers**

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital
- Governance: business rights, corruption, democratic life, political stability, security

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

● **How did the sustainability indicators perform?**

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the financial product:

- The percentage of the financial product’s portfolio compliant with the RBC Policy: **100%**
- The percentage of the financial product’s portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **99.4%**
- The weighted average ESG score of the financial product’s portfolio compared to the weighted average ESG score of its investment universe: **58.7 vs 53.4 (Bloomberg Barclays Multiverse 1-3Y (USD) RI)**
- The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **28.6%**

● **...and compared to previous periods ?**

Indicator	2022*	2023**	Comparison
The percentage of the financial product’s portfolio compliant with the RBC policy	100%	100%	In line with the financial product’s commitment
The percentage of the portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	99.7%	99.4%	In line with the financial product’s commitment
The weighted average ESG score of the portfolio compared to the weighted average ESG score of its investment universe	58.5 vs 53.1	58.7 vs 53.4	In line with the financial product’s commitment
The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	34.6%	28.6%	In line with the financial product’s commitment

\*Figures reported in 2022 were calculated on the closing date of the accounting year

\*\* Figures reported in 2023 are expressed as a quaterly weighted average.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology, as defined in the main part of the Prospectus, integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;

b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.

3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the BNPP AM ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;

b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

The proportion of investments of the financial product made in economic activities and that qualify as sustainable investments under the SFDR may contribute to the environmental objectives as defined under Taxonomy Regulation: climate change mitigation and climate change adaptation.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

--- *How were the indicators for adverse impacts on sustainability factors taken into account?*

The investment manager ensures that throughout its investment process, the financial product takes into account all the principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process : RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

As regards the sustainable investments that the financial product intends to make, the following principal adverse sustainability impacts are taken into account:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water

9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The investment universe of the financial product is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors ?

The product considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the financial product's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies

4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

## What were the top investments of this financial product?

Largest investments**	Sector	% Assets*	Country**
TD BANCO SANTANDER SA 31-AUG-2023	Financials	1.71%	Spain

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

\* Any percentage differences with the financial statement portfolios result from a rounding difference.

\*\* Any difference with the portfolio statements above are coming from the use of different data's sources.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.06.2023 to 31.05.2024

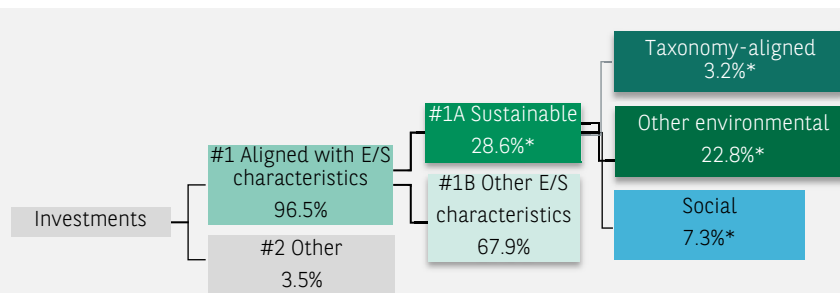

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation ?

The proportion of the investments of the financial product used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is **96.5%**.

The proportion of sustainable investments of the financial product is **28.6%**.

The remaining proportion of the investments is mainly used as described under the question: " What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

\*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

● *In which economic sectors were the investments made ?*

Sectors	% Asset
Financials	67.74%
Other	2.87%
Consumer Discretionary	9.92%
Consumer Staples	1.66%
Energy	2.45%
Integrated Oil & Gas	2.45%
Industrials	2.05%
Materials	1.20%
Health Care	0.44%
Utilities	6.98%
Communication Services	2.53%
Real Estate	1.39%
Information Technology	0.02%
Cash	0.77%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.  
The largest investments are based on official accounting data and are based on the transaction date.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The financial product did not commit itself to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, but did do so.

The two graphs below illustrate, according to the data available, the extent to which sustainable investments with an environmental objective are aligned with the EU Taxonomy and contribute to the environmental objectives of climate change mitigation and adaptation.

The management company uses data from third-party providers to measure the proportion of investments that are aligned with the EU Taxonomy. Providers collect companies' self-reported alignment KPIs and may use equivalent information where these are not readily available in public disclosures. More information on BNPP AM the methodology and the providers used can be found here: <https://docfinder.bnpparibas-am.com/api/files/0EE37EC2-8612-48A5-8AA1-D5C09CCB58DD>

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Further updates of the prospectus and the alignment of commitments with the EU Taxonomy may be made accordingly.

Economic activities that are not recognised by the EU taxonomy are not necessarily harmful to the environment or unsustainable. Moreover, not all activities that can make a substantial contribution to environmental and social objectives are yet integrated into the EU Taxonomy.

The compliance of those investments with the requirements laid down in article 3 of Regulation (EU) 2020/852 (Taxonomy Regulation) has not been subject to an assurance provided by an auditor or review by a third party.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?*

- Yes:
  - In fossil gas
  - In nuclear energy
- No:

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* Real taxonomy aligned

● *What was the share of investments made in transitional and enabling activities?*

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?*

Revenue	
2022*	2.7%
2023**	3.2%

\*Figures reported in 2022 were calculated on the closing date of the accounting year

\*\* Figures reported in 2023 are expressed as a quarterly weighted average.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **22.8%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

Socially sustainable investments represent **7.3%** of the financial product.

### What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- The proportion of assets that are not used to meet the environmental or social characteristics promoted by the financial product. These assets are used for investment purposes, or
- Instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards:

- The risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- The RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The financial product shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

More information on the RBC Policy, and in particular criteria relating to sectoral exclusions, can be found on the website of the investment manager: Sustainability documents - BNPP AM Corporate English (<https://www.bnpparibas-am.com/sustainability-documents/>)

- The financial product shall have the weighted average ESG score of its portfolio higher than the average weighted ESG score of its investment universe
- The financial product shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the proprietary ESG methodology
- The financial product shall invest at least 10% of its assets in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation. Criteria to qualify an investment as 'sustainable investment' are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and the quantitative and qualitative thresholds are mentioned in the main part of the Prospectus

In addition, the management company has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

## How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

- *How does the reference benchmark differ from a broad market index?*  
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
Not applicable
- *How did this financial product perform compared with the reference benchmark?*  
Not applicable
- *How did this financial product perform compared with the broad market index?*  
Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : BNP PARIBAS INSTICASH GBP 1D LVNAV

Legal Entity Identifier: 2138000LGEY58FEVXL03

## ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investment with an environmental objective**: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective** : \_\_\_%

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **17.0%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

#### Corporate issuers

The investment strategy selects:

Corporate issuers with good or improving ESG practices within their sector of activity. The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity)
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

### **Sovereign issuers**

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital
- Governance: business rights, corruption, democratic life, political stability, security

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

● *How did the sustainability indicators perform?*

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the financial product:

- The percentage of the financial product’s portfolio compliant with the RBC Policy: **100%**
- The percentage of the financial product’s portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **100%**
- The weighted average ESG score of the financial product’s portfolio compared to the weighted average ESG score of its investment universe: **59.3 vs 53.4 (Bloomberg Barclays Multiverse 1-3Y (USD) RI)**
- The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **17.0%**

● *...and compared to previous periods ?*

Indicator	2022*	2023**	Comparison
The percentage of the financial product’s portfolio compliant with the RBC policy	100%	100%	In line with the financial product’s commitment
The percentage of the portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	98.6%	100%	In line with the financial product’s commitment
The weighted average ESG score of the portfolio compared to the weighted average ESG score of its investment universe	58.5 vs 53.1	59.3 vs 53.4	In line with the financial product’s commitment
The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	26.5%	17.0%	In line with the financial product’s commitment

\*Figures reported in 2022 were calculated on the closing date of the accounting year

\*\* Figures reported in 2023 are expressed as a quarterly weighted average.

● *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology, as defined in the main part of the Prospectus, integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;

b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.

3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the BNPP AM ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;

b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The investment manager ensures that throughout its investment process, the financial product takes into account all the principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process : RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

As regards the sustainable investments that the financial product intends to make, the following principal adverse sustainability impacts are taken into account:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Compact principles and OECD Guidelines for Multinational Enterprises  
12. Unadjusted gender pay gap  
13. Board gender diversity  
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The investment universe of the financial product is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors ?

The product considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the financial product's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies

4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

## What were the top investments of this financial product?

Largest investments**	Sector	% Assets*	Country**

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

\* Any percentage differences with the financial statement portfolios result from a rounding difference.

\*\* Any difference with the portfolio statements above are coming from the use of different data's sources.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.06.2023 to 31.05.2024

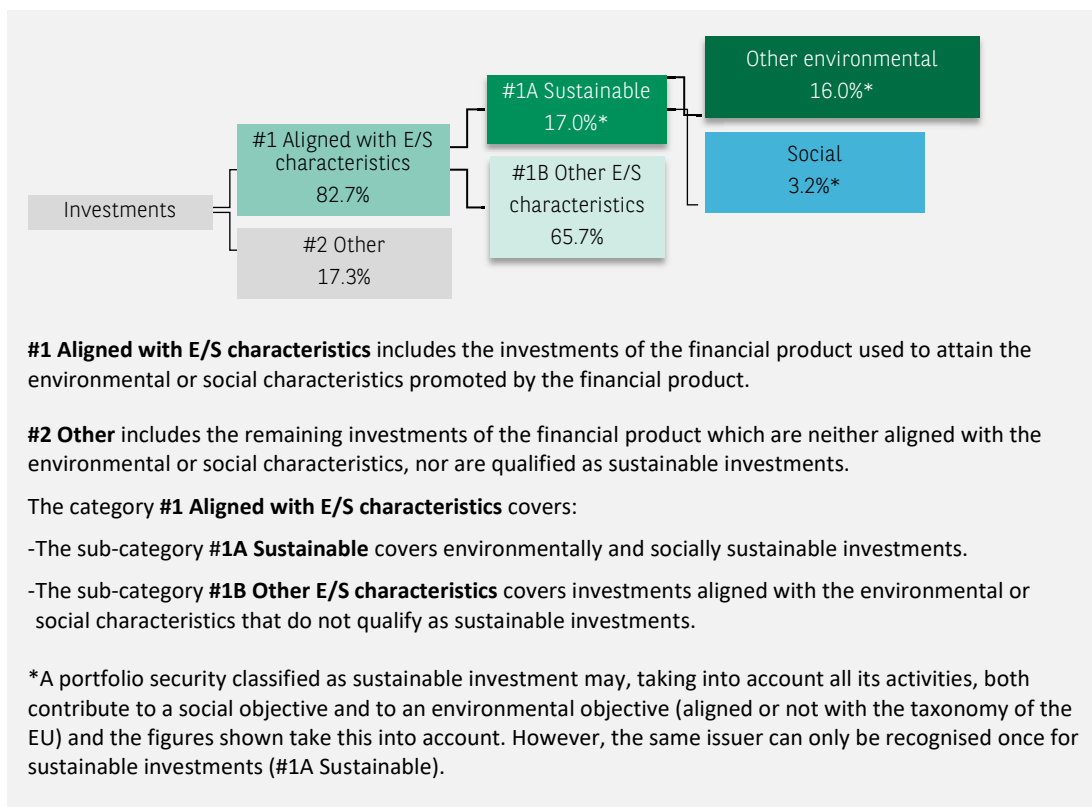

## What was the proportion of sustainability-related investments?

### ● *What was the asset allocation ?*

The proportion of the investments of the financial product used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is **82.7%**.

The proportion of sustainable investments of the financial product is **17.0%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

### ● *In which economic sectors were the investments made ?*

Sectors	% Asset
Financials	78.42%
Cash	8.42%
Other	7.66%
Consumer Discretionary	4.84%
Industrials	0.53%
Energy	0.13%
Oil & Gas Equipment & Services	0.13%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average. The largest investments are based on official accounting data and are based on the transaction date.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product did not commit to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, and it did not do so.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

- Yes:
  - In fossil gas
  - In nuclear energy
- No:

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* Real taxonomy aligned

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of investments made in transitional and enabling activities?**  
The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

Revenue	
2022*	0.1%
2023**	0%

\*Figures reported in 2022 were calculated on the closing date of the accounting year  
\*\* Figures reported in 2023 are expressed as a quarterly weighted average.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **16.0%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

 **What was the share of socially sustainable investments?**

Socially sustainable investments represent **3.2%** of the financial product.

 **What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?**

The remaining proportion of the investments may include :

- The proportion of assets that are not used to meet the environmental or social characteristics promoted by the financial product. These assets are used for investment purposes, or
- Instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards:

- The risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- The RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal,

controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The financial product shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

More information on the RBC Policy, and in particular criteria relating to sectoral exclusions, can be found on the website of the investment manager: Sustainability documents - BNPP AM Corporate English (<https://www.bnpparibas-am.com/sustainability-documents/>)

- The financial product shall have the weighted average ESG score of its portfolio higher than the average weighted ESG score of its investment universe
- The financial product shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the proprietary ESG methodology
- The financial product shall invest at least 10% of its assets in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation. Criteria to qualify an investment as 'sustainable investment' are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and the quantitative and qualitative thresholds are mentioned in the main part of the Prospectus

In addition, the management company has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

## How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

- *How does the reference benchmark differ from a broad market index?*  
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
Not applicable
- *How did this financial product perform compared with the reference benchmark?*  
Not applicable
- *How did this financial product perform compared with the broad market index?*  
Not applicable

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : BNP PARIBAS INSTICASH USD 1D LVNAV

Legal Entity Identifier: 5493004L3MM7ZZN1H71

## ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS

Did this financial product have a sustainable investment objective?

Yes

No

It made sustainable investment with an environmental objective: \_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made sustainable investments with a social objective : \_\_\_%

It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of **21.1%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did not make any sustainable investments

Unless otherwise specified, all actual data, within this periodic report are expressed as a quarterly weighted average.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

#### Corporate issuers

The investment strategy selects:

Corporate issuers with good or improving ESG practices within their sector of activity. The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity)
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

### **Sovereign issuers**

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital
- Governance: business rights, corruption, democratic life, political stability, security

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

The environmental objectives as well as the social objectives to which the sustainable investments of the financial product have contributed are indicated in the question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

● **How did the sustainability indicators perform?**

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the financial product:

- The percentage of the financial product’s portfolio compliant with the RBC Policy: **100%**
- The percentage of the financial product’s portfolio covered by ESG analysis based on the ESG internal proprietary methodology: **98.5%**
- The weighted average ESG score of the financial product’s portfolio compared to the weighted average ESG score of its investment universe: **59.6 vs 53.4 (Bloomberg Barclays Multiverse 1-3Y (USD) RI)**
- The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation: **21.1%**

● **...and compared to previous periods ?**

Indicator	2022*	2023**	Comparison
The percentage of the financial product’s portfolio compliant with the RBC policy	100%	100%	In line with the financial product’s commitment
The percentage of the portfolio covered by the ESG analysis based on the ESG internal proprietary methodology	99.4%	98.5%	In line with the financial product’s commitment
The weighted average ESG score of the portfolio compared to the weighted average ESG score of its investment universe	60.2 vs 53.1	59.6 vs 53.4	In line with the financial product’s commitment
The percentage of the financial product’s portfolio invested in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation	25.3%	21.1%	In line with the financial product’s commitment

\*Figures reported in 2022 were calculated on the closing date of the accounting year

\*\* Figures reported in 2023 are expressed as a quarterly weighted average.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments made by the financial product are to finance companies that contribute to environmental and/or social objectives through their products and services, as well as their sustainable practices.

The internal methodology, as defined in the main part of the Prospectus, integrates several criteria into its definition of sustainable investments that are considered to be core components to qualify a company as sustainable. These criteria are complementary to each other. In practice, a company must meet at least one of the criteria described below in order to be considered as contributing to an environmental or social objective:

1. A company with an economic activity aligned with the EU Taxonomy objectives. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the EU Taxonomy. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: sustainable forestry, environmental restoration, sustainable manufacturing, renewable energy, water supply, sewerage, waste management and remediation, sustainable transportation, sustainable buildings, sustainable information and technology, scientific research for sustainable development;
2. A company with an economic activity contributing to one or more United Nations Sustainable Development goals (UN SDG) targets. A company can be qualified as sustainable investment in case it has more than 20% of its revenues aligned with the SDGs and less than 20% of its

revenues misaligned with the UN SDGs. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: sustainable agriculture, sustainable management of water and sanitation, sustainable and modern energy, sustainable economic growth, sustainable infrastructure, sustainable cities, sustainable consumption and production patterns, fight against climate change, conservation and sustainable use of oceans, seas and marine resources, protection, restoration and sustainable use of terrestrial ecosystems, sustainable management of forests, fight against desertification, land degradation and biodiversity loss;

b. Social: no poverty, zero hunger, food security, healthy lives and well-being at all ages, inclusive and equitable quality education and lifelong learning opportunities, gender equality, women and girls empowerment, availability of water and sanitation, access to affordable, reliable and modern energy, inclusive and sustainable economic growth, full and productive employment and decent work, resilient infrastructure, inclusive and sustainable industrialization, reduced inequality, inclusive, safe and resilient cities and human settlements, peaceful and inclusive societies, access to justice and effective, accountable and inclusive institutions, global partnership for sustainable development.

3. A company operating in a high GHG emission sector that is transitioning its business model to align with the objective of maintaining the global temperature rise below 1.5°C. A company qualifying as sustainable investment through this criteria can for example contribute to the following environmental objectives: GHG emissions reduction, fight against climate change;

4. A company with best-in-class environmental or social practices compared to its peers within the relevant sector and geographical region. The E or S best performer assessment is based on the BNPP AM ESG scoring methodology. The methodology scores companies and assesses them against a peer group comprising companies in comparable sectors and geographical regions. A company with a contribution score above 10 on the Environmental or Social pillar qualifies as best performer. A company qualifying as sustainable investment through this criteria can for example contribute to the following objectives:

a. Environmental: fight against climate change, environmental risk management, sustainable management of natural resources, waste management, water management, GHG emissions reduction, renewable energy, sustainable agriculture, green infrastructure;

b. Social: health and safety, human capital management, good external stakeholder management (supply chain, contractors, data), business ethics preparedness, good corporate governance.

Green bonds, social bonds and sustainability bonds issued to support specific environmental and/or social projects are also qualified as sustainable investments provided that these debt securities receive an investment recommendation 'POSITIVE' or 'NEUTRAL' from the Sustainability Center following the issuer and underlying project assessment based on a proprietary Green/Social/Sustainability Bond Assessment methodology.

Companies identified as a sustainable investment should not significantly harm any other environmental or social objectives (the Do No Significant Harm 'DNSH' principle) and should follow good governance practices. BNP Paribas Asset Management (BNPP AM) uses its proprietary methodology to assess all companies against these requirements.

More information on the internal methodology can be found on the website of the investment manager: <https://docfinder.bnpparibas-am.com/api/files/14787511-CB33-49FC-B9B5-7E934948BE63>

*How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

Sustainable investments that the product partially intends to make should not significantly harm any environmental or social objective (DNSH Principle). In this respect, the investment manager commits to consider principal adverse impacts on sustainability factors by taking into account indicators for adverse impacts as defined in SFDR, and to not invest in companies that do not meet their fundamental obligations in line with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights.

— — — *How were the indicators for adverse impacts on sustainability factors taken into account?*

The investment manager ensures that throughout its investment process, the financial product takes into account all the principal adverse impact indicators that are relevant to its investment strategy to select the sustainable investments that the financial product partially intends to make by systematically implementing the sustainable investment pillars defined in the BNP Paribas Asset Management Global Sustainability Strategy (GSS) into its investment process : RBC policy, ESG integration guidelines, Stewardship, the forward-looking vision the '3Es' (Energy transition, Environmental sustainability, Equality & Inclusive Growth).

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

As regards the sustainable investments that the financial product intends to make, the following principal adverse sustainability impacts are taken into account:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Compact principles and OECD Guidelines for Multinational Enterprises  
12. Unadjusted gender pay gap  
13. Board gender diversity  
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct

9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity

16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The investment universe of the financial product is periodically screened with a view to identify issuers that are potentially in violation or at risk of violation of the UN Global Compact Principles, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business & Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. This assessment is conducted within the BNPP AM Sustainability Centre on the basis of internal analysis and information provided by external experts, and in consultation with BNP Paribas Group CSR Team. If an issuer is found to be in serious and repeated violations of any of the principles, it will be placed on an 'exclusion list' and will not be available for investment. Existing investments should be divested from the portfolio according to an internal procedure. If an issuer is at risk of violating any of the principles, it is placed on a 'watch list' monitored, as appropriate.

*The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors ?

The product considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment
- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts
- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues
- Ensuring all securities included in the portfolio have supportive ESG research
- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the financial product's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:

1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies

4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:

Environment

4. Investments in companies without carbon emission reduction initiatives

Social

4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:

15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: <https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-BOED-84FC06E090BF>

## What were the top investments of this financial product?

Largest investments**	Sector	% Assets*	Country**
TD BANCO SANTANDER SA 31-AUG-2023	Financials	2.32%	Spain
TD BANCO SANTANDER SA 29-FEB-2024	Financials	2.11%	Spain

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average.

The largest investments are based on official accounting data and are based on the transaction date.

\* Any percentage differences with the financial statement portfolios result from a rounding difference.

\*\* Any difference with the portfolio statements above are coming from the use of different data's sources.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From 01.06.2023 to 31.05.2024

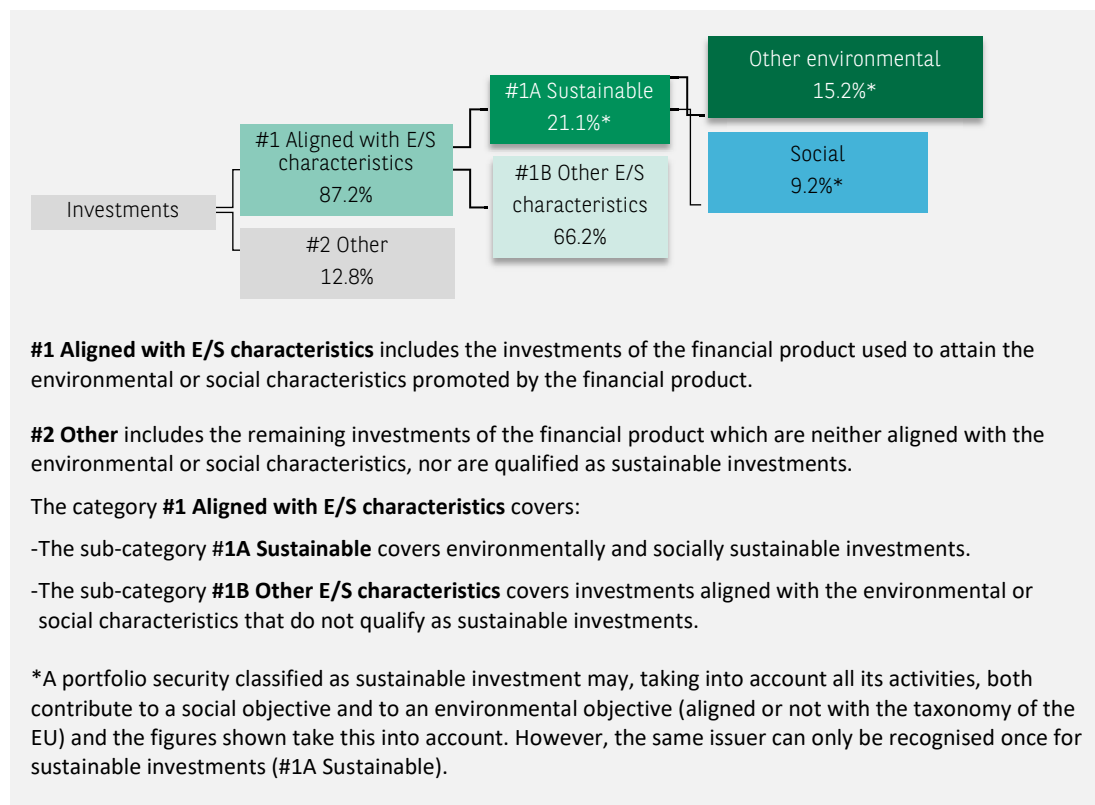

## What was the proportion of sustainability-related investments?

### ● What was the asset allocation ?

The proportion of the investments of the financial product used to meet the environmental or social characteristics promoted, in accordance with the binding elements of the investment strategy of the financial product is **87.2%**.

The proportion of sustainable investments of the financial product is **21.1%**.

The remaining proportion of the investments is mainly used as described under the question: "What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?"

### ● In which economic sectors were the investments made ?

Sectors	% Asset
Financials	74.97%
Other	11.84%
Cash	7.40%
Consumer Discretionary	4.31%
Industrials	0.80%
Health Care	0.43%
Energy	0.16%
Oil & Gas Equipment & Services	0.16%
Real Estate	0.08%

Source of data: BNP Paribas Asset Management, expressed as a quarterly weighted average. The largest investments are based on official accounting data and are based on the transaction date.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product did not commit to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, and it did not do so.

### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

The data covering the proportion of taxonomy-aligned activities related to fossil gas and nuclear energy and on which the report is based in this respect were solely available starting from the last quarter of the accounting year.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

\*\* Real taxonomy aligned

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?**

Revenue	
2022*	0%
2023**	0%

\*Figures reported in 2022 were calculated on the closing date of the accounting year  
 \*\* Figures reported in 2023 are expressed as a quarterly weighted average.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that are not aligned with the European Taxonomy Regulation is **15.2%**.

The management company is improving its systems for collecting data in line with the EU Taxonomy to ensure the accuracy and adequacy of published sustainability information under the European Taxonomy Regulation. Meanwhile, the financial product will invest in sustainable investments whose environmental objective is not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

Socially sustainable investments represent **9.2%** of the financial product.

**What investments were included under 'other', what was their purpose and were there any minimum environmental or social safeguards?**

The remaining proportion of the investments may include :

- The proportion of assets that are not used to meet the environmental or social characteristics promoted by the financial product. These assets are used for investment purposes, or
- Instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards:

- The risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- The RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal,

controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

## What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The financial product shall comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

More information on the RBC Policy, and in particular criteria relating to sectoral exclusions, can be found on the website of the investment manager: Sustainability documents - BNPP AM Corporate English (<https://www.bnpparibas-am.com/sustainability-documents/>)

- The financial product shall have the weighted average ESG score of its portfolio higher than the average weighted ESG score of its investment universe
- The financial product shall have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the proprietary ESG methodology
- The financial product shall invest at least 10% of its assets in 'sustainable investments' as defined in Article 2 (17) of the SFDR regulation. Criteria to qualify an investment as 'sustainable investment' are indicated in the above question "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?" and the quantitative and qualitative thresholds are mentioned in the main part of the Prospectus

In addition, the management company has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: <https://www.bnpparibas-am.com/en/sustainability-documents/>

## How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

- *How does the reference benchmark differ from a broad market index?*  
Not applicable
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*  
Not applicable
- *How did this financial product perform compared with the reference benchmark?*  
Not applicable
- *How did this financial product perform compared with the broad market index?*  
Not applicable

Not applicable

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
